Press information

Angler Gaming PLC

Big Winner on Angler Gaming

On the 20th November, one of our high roller players won the sum of €569,000 Euros.

Whilst we would like to congratulate the player this win will most certainly result in lower revenues and probably a loss for the last quarter of 2015.

Angler Gaming had two consecutive profit quarters in 2015 with the October net profit after tax being 52,621 EUR.

Until this win November had an all-time-high in revenues. Deposits in November up to today are also at all-time-high levels (9.4% up from October).

Angler Gaming is removing some of its high stake games to reduce the risk of such big payouts, given the size of the company, but is able to cover this big win without any additional funding requirements.
